

# Find out why more businesses prefer Palladium.

Here are just some reasons why Palladium is the fastest growing accounting software in South Africa.

## Money-Back Guarantee

Palladium is the only company in the World that offers a money-back guarantee against data corruption.

## Embedded Business Intelligence

Palladium offers embedded Business Intelligence in all product offerings at no additional charge, allowing clients to analyse data in a 3-dimensional drag and drop basis with full graphical representations.

## Credit Note Authorisations\*

Create credit note requests to ensure management authorisation on all credit notes processed.

## ERP functionality at SME pricing

## "Any Day" Reporting

"Any Day" reporting allows you to run all your reports at any date in history, from Customer Aging, Inventory Valuation Reports, Income Statements to Balance Sheets.

## Complete Transactional History For Life

Palladium stores all Information for Life allowing you to generate all your financial and transactional reports since business inception, alleviating the need to go back and forth across backup companies.

## 3-year money back guarantee on data corruption

## Dynamic Database Connectivity with Embedded VPN

Palladium's Dynamic database connectivity feature and embedded VPN capabilities mean that Palladium doesn't retain a fixed connection to the database when you are not transacting, and is not susceptible to power surges or fluctuations like other accounting software packages, alleviating the need to re-login or reboot your terminal.

## Guaranteed Lowest Cost of Ownership

Palladium's solid stability means that your business maintains maximum up-time all the time. No data corruption means no downtime, resulting in no additional consulting costs, no lost staff productivity and no theft or duplicate costs from switching to and from manual systems.

## advanced, stable and easy to use

## Maximise Sales with Dynamic Upsell Functionality\*

Set an unlimited number of Upsell Items to a product with optional dynamic Upsell prompting per processing screen.

## Create "Freehand" Quotes\*

Create freehand quotes for current or prospective customers with any standard or non-standard goods or services while managing mark-ups and defining preferred suppliers.

## Serial Number Tracking\*

Setup Serial Number types and assign numbers at time of receiving, selling or both.

## supports wireless networking

## Unsurpassed Financial Reporting

Palladium offers unsurpassed financial reporting with Main and Sub Accounts, Departments and up to 5 levels of Cost Centres, offering extensive flexibility. This is further enhanced using the Projects functionality.

## Microsoft Certified Software

Palladium's software is Microsoft certified having undergone rigorous testing to ensure optimal compatibility with today's operating systems. Palladium supports both 32-bit and 64-bit operating systems and ships with MS SQL Server 2008 R2 free for up to 10 users.

## Financial Budgeting and Targets or Forecasts Throughout\*

Budget in all facets of the application including GL, Departments or Branches, Profit Centres, Customers, Suppliers, Projects and even Inventory and Service Items, affording you the ability to measure your performance throughout.

## Multi-Warehousing, Pick Tickets and Distribution\*

Manage unpicked orders with Pick Ticket workflow, or optionally manage deliveries with delivery routes, assigning invoices to vehicles or containers with full manifest printing. Manage an unlimited number of warehouses with provision for Standard, Repair or In-Transit Warehouses.

## Microsoft certified software

## User-Definable Fields Throughout\*

Palladium make use of user-definable fields throughout the system from the General Ledger, Customers, Suppliers, Projects and Inventory masterfiles with the only product to offer this feature at document as well as document line item level.

## Copy Sales and Purchase History on All Processing Documents\*

View Customer and Supplier History at time of sale with the ability to copy documents or selected items from multiple documents to the current screen.

## Project Cost Tracking and Budgeting\*

Track the revenue and costs of various projects and include all project info from bids, to progress payments and even attach all communication and tender documents. You can also budget for items by Cost, Revenue or Quantity.

## Adjust Documents Securely

Adjust all documents with full user security, complete general transactional integrity and document user-audit trail amendment reports from a completeness point of view.

## one price for all features

## General Ledger Account Security

Control account access and reporting with user account security.

## Manufacturing\*

Manufacture or dis-assemble items with additional costs and the ability to manufacture multiple finished goods items or by-products.
